EDUCATION

University of Utah

May 2026

Honors B.S. in Computer Science, Minors in Mathematics and Ecology | GPA 3.89

- Dean's List (x8), IEEE Honors Society Treasurer, Phi Beta Delta Honors Society
- Relevant Coursework: Data Structures & Algorithms, Database Systems, Computer Security, Machine Learning, Web Software Development

EXPERIENCE

Peraton | Apims Development Team

January 2025–December 2025

Full Stack Development Intern

Layton, UT

- Developed features for a React/Java web application supporting environmental compliance for the U.S. Air Force and allied military organizations.
- Migrated a legacy testing system to Selenium automation, increasing test coverage by 10%.
- Created SQL scripts for Oracle warehouse data version management.
- Improved application security by migrating backend query logic from TopLink to Hibernate and implementing role-based access controls.
- Contributed to Agile development cycles with bi-weekly production releases.

University of Utah | Khalert School of Computing

August 2024–December 2024

Teaching Assistant

- Led weekly lab sessions for an introductory computer science course, reinforcing lecture concepts through coding exercises.
- Held 6 office hours per week, assisting students with Python programming and debugging, while grading assignments and collaborating with instructional staff.

PROJECTS

Portfolio Website | React, TypeScript, CSS

May 2026–Present

- Developing a personal portfolio website to showcase software engineering projects and technical experience.
- Designing a responsive, desktop-inspired user interface with React and modern CSS practices.
- Building reusable UI components and implementing automated deployment workflows using Git and cloud hosting platforms.

PopMedia | Python, Dart, PostgreSQL, Flutter

August 2025–May 2026

- Led frontend development for a cross-platform (iOS, Android, web) multimedia rating and reviewing application. Used Figma to create interactive prototypes for unique UI design.
- Designed and implemented a relational PostgreSQL database using Supabase for scalable data management.
- Integrated REST APIs including ISBNDB and TMDb to access and manage a large external media catalog.
- Implemented secure user authentication using Firebase Authentication and JSON Web Tokens.
- Developed a comprehensive testing suite and CI/CD pipeline, incorporating TestFlight user feedback to improve application quality and reliability.

Flight Club | C++, JSON

August 2024–December 2024

- Developed a level-based educational game for bird identification in C++, implementing game logic, JSON-based data management, and Agile team development practices.

TECHNICAL SKILLS

Languages: Python, Java, C#, C++, TypeScript, Dart, SQL

Frameworks & Libraries: React, Flutter, FastAPI, PyTorch, NumPy, Selenium

Databases: PostgreSQL, MySQL, Oracle, Supabase

Developer Tools: Git, Docker, AWS, Firebase, Figma
